Next Dent resins

LEADING DENTAL MATERIALS FOR 3D PRINTING

BIO-COMPATIBLE AND CE CERTIFIED

So what makes NextDent unique? It's the sheer choice you have in dental 3D printable materials, which are all biocompatible and CE-certified, making them suitable for a wide range of applications. Our products are classified in accordance with the medical device directive 93/42/EEC, making them suitable for local registrations as well. We offer material in a spectrum of colours, depending on the daily use and the preferences of our customer.

These materials allow you to print trays, models, drilling templates, and temporary crowns and bridges. And growing, as NextDent adds new materials for dental technology and dental care industries to its range regularly.

SHEER CHOICE
