High performance polymer

FOR DIGITAL SPLINT THERAPIES

HIGH-IMPACT THERMOPLASTIC

- Biocompatible—medical thermoplastic—no chemoplastic
- High fracture resistance and long-term stability (bruxism treatment)
- Good polishing properties—smooth surfaces are less susceptible to discolouration and plaque deposits.

SUITABLE FOR;

- Bite splints
- Therapeutic splints
- Bite regulators.

(Due to its properties, the material is indicated for the oral cavity for up to 12 months)
