

FormLabs resins

HIGH ACCURACY 3D PRINTING MATERIALS FOR DENTAL LABS AND PRACTICES

Bring production in-house or improve existing workflows with industry-leading Formlabs 3D printers. Our dental resins empower dental labs and practices to rapidly manufacture biocompatible surgical guides, splints, fixed patterns and models, clear aligner models, and full dentures.

Dental Model Resin

An accurate material for dental modelmaking and clear aligner production

Dental SG Resin

An autoclavable, biocompatible material for 3D printing surgical guides

Dental LT Clear Resin

A long-term clear biocompatible material for splints and occlusal guards

Castable Wax Resin

A highly accurate material for casting and pressing crowns, bridges, and RPDs

Standard Grey Resin

A precise general purpose model making material
